

PANNEAU  
PIANO

# ACOUSTIC PANELS

Made in France from *recycled plastic bottles*

# CONTENTS

## **I/ A committed manufacturer, P-4**

## **2/ Panneau Piano, P-11**

Panneau Piano is an acoustic, attractive and responsible panel

## **3/ Colours, P-13**

20 colours in the origin & print collection

## **4/ Shapes, P-15**

Multiple cut-out shapes in the acoustical felt.

They allow for multi-coloured compositions.

## **5/ Engraved, P-27**

Multiple engravings made in the thickness of the panel.

They allow for panoramic assemblies.

> Panel 1200 × 2400 mm P- 27

> 1/2 Panel 1200 × 1200 mm P- 32

## **6/ Strips, P-39**

Strips are installed as a suspension according to the compositions.

## **7/ Islands, P-47**

Islands are installed as a suspension.

# MESNARD CATTEAU

## A COMMITTED FRENCH MANUFACTURER

### Once upon a time ...

Located in the Central Loire Valley since 1948, Mesnard Catteau is a family-based industrial company specialising in textiles.  
Originally a producer of felt for hat makers and slippers, the company diversified in the 80's and began producing wall-to-wall carpeting.  
It continued its growth by moving into the automobile industry and then gardening products in the 2000's.

### Environment & design

Mesnard Catteau plays an active role in favour of sustainable development, in particular thanks to the integration of eco-design practices into its production processes.  
The company is convinced that it is possible to combine competitiveness, respect for the environment and enhance the value of French industrial know-how, thus building a sustainable future for all. The Panneau Piano range incarnates this approach which is resolutely environment oriented.

# PANNEAU PIANO

## ATTRACTIVE & RESPONSIBLE

### Optimum acoustic performance

The Panneau Piano range allows for superior acoustic comfort in buildings that welcome a large number of people such as places of work, schools, hotels, sports and music centres, and many others. Thanks to their innovative design, they provide optimum acoustic control, and as such create a calm atmosphere that favours concentration and exchange.

### Low-carbon local manufacturing

Our eco-designed panels are comprised of 50% fibres from the recycling of plastic bottles and can also be recycled.  
The Panneau Piano range is manufactured entirely in France, with local procurement located less than 800 km from the production site in Loiret.  
This information is part of the FDES (Environmental and Health declaration forms).

### A modular decorative solution

With its 20 colours, the Panneau Piano range was designed to blend in with the surrounding decoration and ambiance.  
Its many shapes and geometrical engravings allow for an attractive graphic rendering suited for contemporary decoration with all its textures and depths.

## COMMITMENT

With **50% RECYCLED MATERIAL** & **50% technical fibres**

**1 Panneau Piano** 24 mm = **175 recycled** PET bottles

# COLOURS

## 2 ADDITIONAL COLLECTIONS

**ORIGIN** COLLECTION - 12 colours created with mass-dyed fibres, mixed for a mottled look, a singularity of felt.  
The recycled fibres used in the composition of Panneau Piano can cause slight colour variations.

**PRINT** COLLECTION - 8 additional colours with shades thanks to a veil of ink added to the ORIGINS for a more unified rendering.

### COLOURS - **ORIGIN** COLLECTION

|                                                                                                                           |                                                                                                                           |                                                                                                                           |                                                                                                                     |                                                                                                                       |                                                                                                                     |

# SHAPES

12 or 24 mm thick, the shapes cut out in the felt are glued to the wall to provide the area with acoustic comfort.

The shapes and examples of the classic compositions, graphics, tufts, scales and tangrams provide many possibilities, by combing shapes and colours to achieve highly decorative and dynamic walls.

**Each composition shown in the catalogue is cut out from one panel, of one colour.** To create multi-coloured compositions, several compositions have to be ordered in the desired colours.

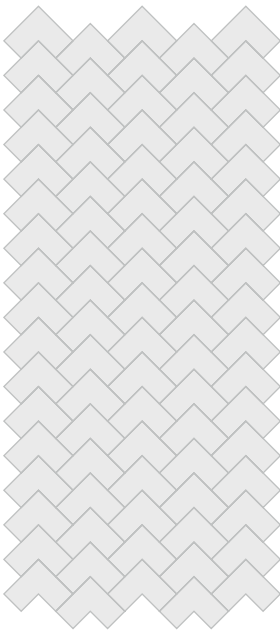

*Order two Compo ECA / 01 in Anthracite and in Grey to create this example.*

# ENGRAVED

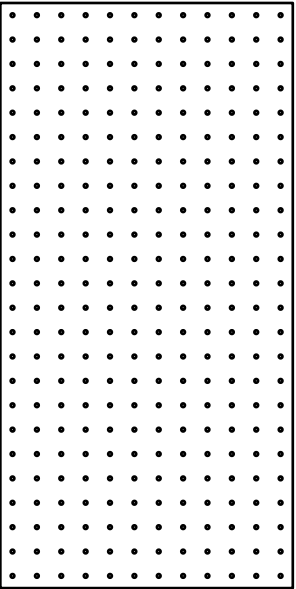

12 or 24 mm thick, engraved panels allow for acoustical correction on surfaces where it is needed. Engraving offers a highly graphical attractive rendering which allows for a wide variety of panoramic design in the decoration.

# ISLANDS

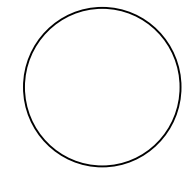

Islands are 24 mm thick and are installed as a suspension. They come in different shapes and participate in improving the sound environment of very high collective areas.
